Professional Summary

Results-driven **Cloud Operations & DevOps Engineer** with a 5,000-hour self-directed technical residency specializing in resilient, decentralized infrastructure. Expert in bridging the gap between Cloud (AWS/Azure) and the Edge. Proven track record in building production-grade AI agents with a focus on **FinOps optimization** (achieving \$1.50/mo operating costs) and **Zero-Trust security**. Dedicated to community sovereignty through robust, rural-first technical architecture.

Technical Skills

- **Cloud & IaC:** AWS, Microsoft Azure, Terraform (Modular IaC), Docker, Kubernetes (K8s).
 - **Networking & Security:** Cisco Packet Tracer, VLAN Segmentation, Site-to-Site VPN, Managed Identities (OAuth2), IAM, DevSecOps.
 - **AI & Automation:** Azure OpenAI Service, Claude 3.5 Sonnet, Agentic Workflows (LangChain), Python (Automation/Scripting).
 - **DevOps Tools:** GitHub Actions (CI/CD), Linux SysAdmin (Bash), Linear (Project Mgmt), Post-Incident Reviews (PIR).
-

Professional Experience

Lead Cloud Engineer | Nomad-Edge (Sovereignty Series) | Jan 2024 – Present

- **Orchestrated** distributed AWS cloud nodes and remote edge devices using **Terraform** and **Python**, focusing on resilient connectivity for rural infrastructure.
- **Deployed** agentic workflows using **Claude 3.5** to automate B2B data categorization, reducing manual processing time by **70%**.
- **Optimized** cloud spend using a "Deploy-Prove-Destroy" lifecycle, maintaining production-grade prototypes for under **\$2.00/month**.
- **Secured** all AI-integrated pipelines using **Identity-based authentication** (Managed Identities) to eliminate static credential risks.

DevOps Specialist | Freelance & Technical Residency | Jan 2022 – Dec 2023

- **Automated** CI/CD pipelines using **GitHub Actions**, implementing "Shift-Left" security scanning to catch vulnerabilities before deployment.
- **Managed** system health and high-availability environments, utilizing **Post-Incident Reviews (PIRs)** to reduce recurring infrastructure bottlenecks.

- **Architected** secure network topologies for complex environments, including a flagship **Hospital NetOps** project featuring multi-departmental VLAN segmentation.
-

Key Projects

Azure Gmail Email Agent (adventuringghost.com)

- Built an autonomous agent using **Azure OpenAI** and **OAuth2** to categorize and draft technical responses.
- **The "How"**: Leveraged **Terraform** for repeatable infrastructure and **Managed Identities** for zero-trust security.

Hospital NetOps Capstone

- Designed a secure, multi-departmental network topology simulating a healthcare environment.
 - **The "How"**: Implemented HIPAA-compliant segmentation and high-availability routing via **Cisco Packet Tracer**.
-

Education & Certifications

Self-Directed Technical Residency (5,000+ Hours)

- Deep-dive curriculum focused on Cloud Architecture, DevOps, and AI Engineering.

Academic Background: * **Assiniboine Community College**, Graduate.

Certifications & Progress:

- **AWS Certified Developer – Associate** (Intensive Study / Candidate)
- **Cisco Certified Network Associate (CCNA)** (Curriculum Completed / Candidate)
- **Azure AI Fundamentals (AI-900)** (In Progress)
- **CompTIA Security+** (In Progress)
